Arkansas

Comprehensive Opioid Site-based Program

Category 6: Data-driven Responses to Opioid Abuse
Arkansas Category 6: Data-Driven Responses to Opioid Abuse Goals

- Goal 1: Convene an Opioid Misuse Action Group as a subcommittee of the PDO Advisory Council to encourage and support comprehensive cross-system planning and collaboration.

- Goal 2: Assess the impact of specific policy changes on PDMP utilization and/or patient community-level outcomes.

- Goal 3: Implement innovative activities that demonstrate a multi-disciplinary, data-driven approach to addressing the opioid epidemic.

- Goal 4: Provide training and education to opioid prescribers and identify geographic area in Arkansas for the greatest risk for opioid misuse/deaths and provide education, outreach and treatment in a community-based environment.

PDMP Prescriber Comparison Reports

• Quarterly Prescriber Comparison Reports for all prescribers in the state who have prescribed an opioid, showing how they compare to their specialty-based peers and other prescribers in the state.

• The reports tells how many of your patients are receiving opioids and the number of prescriptions you have written and compares them to other providers within your specialty.

• In Arkansas for the first quarter 2018 total 5,595 reports and first quarter 2019 total reports 7,709.

• The law requiring these reports allows for AR Medical Board review after a year of concerning prescribing behaviors.
A Dose of Reality for Students, Parents, and Educators
How to help and avoid addiction to prescription painkillers
What is DOSE OF REALITY

• Preventative Educational Tool for ages 12-25 to help educate on the dangers of prescription painkillers.

• What is prescription misuse, abuse and addiction?

• What are the names of Prescription Painkillers?

• Arkansas Facts and Statistics on Opioid Overdose.

• Signs and Symptoms of Addiction.

• When to call 911?

• Rescue Overdose Drug-Naloxone.

• How to dispose of Medications?

• Resources for treatment options.
DOSE OF REALITY
Pre/Post Test

1. I believe taking someone’s else’s prescription painkillers is okay in some situations, like when I’m not able to see a doctor right away.

2. Death due to misuse or abuse of prescription painkillers is a major problem in the United States.

3. If I call 911 because of a drug overdose and the drugs are there when help arrives, I will be arrested.

4. Prescription painkillers work better than non-prescription painkillers.

5. Flushing or throwing away unused medications is a safe way to dispose of them.
