1999 - 2018 Average Death Rates for Opioid Drugs* Overdose by State

(move cursor over state abbreviation to display death rates by year)

*Opioid Drugs - refer to prescription, illicit, and unspecified drugs containing opioids. A prescription opioid drug requires a medical prescription to be dispensed. An illicit opioid drug is not allowed to be prescribed or possessed under Federal Law. An unspecified opioid drug can be either a prescription or illicit drug.

**Death rates based on counts of less than twenty (death count < 20) are flagged as "Unreliable". A death rate based on fewer than 20 deaths has a relative standard error (RSE(R)) of 23 percent or more. A RES(R) of 23 percent is considered statistically unreliable. Death counts and death rates are "Suppressed" when the figure represents zero to nine (0-9) persons.
