1999 - 2018 Average Death Rates for Prescription* Drug Overdose by State

(move cursor over state abbreviation to display death rates by year)

View Data Tables

*Prescription Drug - refers to a pharmaceutical drug that requires a medical prescription to be dispensed; includes Schedule II - V controlled substances and legend drugs (i.e., amphetamines, barbiturates, opiates, antibiotics, statin drugs). Excludes illicit and unspecified drugs.

**Death rates based on counts of less than twenty (death count < 20) are flagged as "Unreliable". A death rate based on fewer than 20 deaths has a relative standard error (RSE(R)) of 23 percent or more. A RES(R) of 23 percent is considered statistically unreliable. Death counts and death rates are "Suppressed" when the figure represents zero to nine (0-9) persons.
