Details:
Refer to each healthcare licensing board for specific rules. Before a practitioner prescribes or dispenses for the first time, a controlled substance in Schedule II – V to a patient for a period greater than four days, or if there is a gap in prescribing a controlled substance for 30 days or more, the practitioner shall review the PDMP report for the patient for the preceding 12 months and, when available, shall review similar reports from adjacent states, and shall query the PDMP for the patient every three months during the continuous use of a controlled substance for each patient. Provides that a practitioner is not required to query the PDMP before prescribing, ordering, or dispensing a Schedule II – V substance for a patient for a period of four days or less; to a patient in a nursing facility; to a patient in hospice care; or when prescribing, dispensing, or administering of: testosterone, pregabalin, lacosamide, ezogabine, or stimulant therapy for pediatric patients less than age 14. Practitioners licensed to practice in an opioid treatment program shall query the PDMP upon a patient’s initial enrollment into the program and every three months thereafter while prescribing, ordering, administering, or dispensing opioid treatment medications in Schedule II – V for the purpose of treating opioid use disorder.

Reporting Issues:
Veterinarians are not allowed to have an NPI number. This was a required field for NM data submissions. This was changed to be "situational" rather than "required" to bypass this error.

Reporting Misc Information:
☐ Enrollment Mandate Compliance

Enrollment Description:
Veterinarians are exempted from enrollment as data requesters

Enrollment Mandate Compliance Details:
Enrollment Mandate Criteria:
☐ Query Mandate Compliance

Query Description:
Veterinarians can request access to the NM PMP and can voluntarily query the database; however, since veterinarian prescriptions are not standardized in regards to prescription data entry, the queried PMP report may not be all inclusive. Also, there is risk for inadvertent access to non-patient PMP reports, such as the owner of the patient/pet.
