## Patient Matching

- Exact match  Access to patient matching algorithms  
 Probabilistic match Matching data elements:  
 Referential match Matching metrics available:  
 Deterministic match Internal matching barriers:  
 Manual match Interstate matching barriers:  
 Other match method A patient key is created using phonetic first and last names and other patient identifiers. All patients with the same key are considered a match. Different patient keys are considered as matching if associated patient info matches on street address and other patient identifiers. Patient keys are maintained and allow for indexed searches and a rapid response time.
