Minimum Operational Standards for the Treatment of Pain Patients, sets forth language outlining the requirements for the treatment of pain patients by all practices treating pain, regardless of certification or other status. The rule also provides requirements for Gold Designated Practice physicians treating new pain patients who are transferring care from another pain provider.
Subsection (a) provides the minimum requirements for physicians treating pain patients, including standard of care, medical records, pain contracts, and monitoring requirements.
Subsection (b) sets forth requirements for Gold Designated Practice physicians treating new pain patients who are transferring care from another pain provider and provides that the new physician may provide only a one-time 30-day maximum non-refillable prescription for pain.

Non-substantive changes in response to comments were adopted to §195.4(b)(1)©, so that a physician must request medical records from the prior treating physician(s) within 15 business days of seeing the patient, rather than being required to obtain the records within 15 days of seeing the patient. Corresponding non-substantive changes were adopted to §195.4(b)(3), so that a physician must perform certain tasks prior to prescribing additional medications beyond the one-time prescription at the initial visit, if the requested medical records are not received within 15 business days of the date of request, rather than the date of the initial visit.
