PDMP Accounts

- Automatic enrollment with license renewal or application

Enrollment method: [online enrollment](#)

Prescriber account criteria: Prescribers must have a valid Vermont License to practice, a valid DEA and submit a government-issued photo ID as a validation document.

Dispenser account criteria: Dispensers (pharmacists) must have a valid Vermont License to practice, a valid employer DEA and submit a government-issued photo ID as a validation document.

Regulatory Board account criteria: A designated representative of a board responsible for the licensure, regulation, or discipline of health care providers or dispensers pursuant to a bona fide specific investigation may request data from the Vermont Prescription Monitoring System. No direct access.

Law Enforcement account criteria: A drug diversion investigator shall not have access to VPMS except for information provided by the licensing or certification authority. When the Commissioner of Health reasonably suspects that there is fraudulent or illegal activity by a health care provider or dispenser, the Department may provide data on such an instance to the appropriate licensing or certification authority. That authority may report the data that are evidence of suspected fraudulent or illegal activity to a trained law enforcement officer. State and Federal Law Enforcement has authority to access the PDMP data with a court order. No direct access.

Patient Matching

- Exact match Access to patient matching algorithms
 Probablistic match Matching data elements: Patient last name, Patient first name, Patient middle name or initial, Patient address, Patient date of birth, Prescriber, prescribed drug, phone number, pharmacy location, and other fields used when select records are manually reviewed
 Referential match Matching metrics available: True positive matches, False positive matches, True negative matches, False negative matches
 Deterministic match Internal matching barriers: Data quality issues
 Manual match Interstate matching barriers: Data quality issues, Lack of understanding of the matching process, Lack of insight into matching methodology in use,

The above patient matching is ONLY for our analytical work - we do not have access to Appriss's Axis 2.0 matching algorithm. Therefore, reports within the system will differ from those run during analyses and are not reflected for end users within the system.
